

+ summary

I'm a web developer and designer based in Seattle, WA. I'm a lifelong student and lover of learning, especially when it relates to the intersection of technology and our everyday lives. I relish in the process of achieving an interdisciplinary understanding of the world as it ultimately makes me a more well-rounded and empathetic designer of systems. Through programming, dancing, writing, painting, long walks, reading philosophy and anything fantasy or sci-fi I become equipped with the state of mind critical to solving problems. As a natural teacher and leader, I enjoy stepping up to share my knowledge with my peers and love empowering people to find their voice.

+ employment

May 2019 to Current	Client Support Specialist DreamBox Learning · Bellevue, WA I worked closely with many departments including engineering, curriculum, and sales to deliver solutions to client problems. Developed internal scripts using JavaScript to help improve day-to-day workflow for my team including various UI improvements within tools like Salesforce and enabling bulk operations in our internal tools. Analyzed incoming client data, troubleshoot issues using internal tools, and reported client inquiries and needs. Offered specialized knowledge of company services and products to clients to help onboard new clients.
Aug. 2018 to May 2019	Junior Web Developer Traditions of the Ancestors · Seattle, WA Collaborated on a small team in the early stages of developing a platform for exploring and connecting with the world's cultures. Currently in public beta. My contributions included implementing a visualization of our app's data, work on the user-facing and site admin UI, event tracking with Google Analytics, social sharing and more. www.tota.world • JavaScript • Node.js • Express.js • jQuery • Underscore.js • MySQL • Google Analytics • Kanban
May 2018 to Apr. 2019	Apprentice Web Developer Ian Gilman · Seattle, WA Apprenticeship under a senior web developer. My day-to-day tasks involved typing out and collaborating on dictated code which reinforced the learning of coding best practices and other programming skills. It has shown to be an amazing opportunity to learn how to work effectively as a remote developer on a team and all that goes into bringing a project from scratch to production ready apps and experiences. • Javascript • HTML • CSS • Data Viz • WebVR • JIRA • Asana • GitHub/Git • Slack
Sept. 2012 to Current	Fashion Model TCM Models · International Runway, Fashion Editorial, Fitness board model.

+ education

2018	General Assembly WDI Graduate A 12-week web development immersive program, totaling ~480 hours of classroom instruction and 70+ hours of lab work each week in an agile, project-based environment that encouraged collaboration.
2015	University of Washington B.A. Philosophy Concentration in ethics, metaphysics, and philosophy of art (aesthetics).
2013	Bellevue College A.A.

+ projects

Chairman of the Board

A humorous & retro corporate ladder simulator game, à la Oregon Trail. Inspiration came from a game my father programmed in GW Basic back in the 80's.

• HTML5 • CSS3 • JavaScript • jQuery

Mndf.ll

A full-stack daily journal and goal tracking app for cultivating an enriched life featuring user auth, external API, and database utilization.

• PostgreSQL • Express.js • EJS Templating Engine • Node.js • CSS3 with Materialize • HTML5

Nubis.io

A minimal Weather Forecast SPA that enables the user to generate a current and trihoral forecast from selecting point on the map or a specified location. Built with Angular.js and designed from scratch.

• JavaScript • Angular.js • Leaflet.js • HTML5 • LESS • CSS Grid

The Majesty of the 36 Views of Mt. Fuji

An interactive high-resolution art gallery of the most iconic collection of Japanese woodblock art by Katsushika Hokusai.
